SIX SHEETS • ONE FOR HER, FIVE FOR YOU

The two flag paintings come out of the candy jar

Why this changed. Both flag paintings were in the candy jar, so the Chloé Zhao step was carrying three things at once: the blue-light pen and both paintings. Miss it and the endgame is dead. The jar now holds the pen and a framer's delivery card, and the card says where the two paintings are. The failure still costs you the branch, but the paintings are no longer crammed into a sweet jar, and Abyssinia and Gleaners now sit in two different rooms instead of one container.

WHAT TO PRINT AND WHAT TO DO WITH IT

PACKET SHEETS WHAT AND WHY

new	1	Beezley & Daughter, notice of delivery – hers. Two cards on the sheet; cut off the top one and keep the second as a spare. This goes in the candy jar with the blue-light pen. Slot the sheet into the packet after your clue frames. It deliberately does not describe either picture – saying what they are of would hand her Ethiopia and Italy for free.
35-39	5	Setup guide – yours. Swap all five, bin the old ones. New hiding-place rows for the two paintings, the candy jar row rewritten, the flowchart redrawn, and two corrections below.

Where the card says the paintings are. The card is printed with two specific places, and the setup guide lists the same two:

1. Abyssinia – taped flat to the inside of a kitchen cupboard door.
2. Gleaners – standing on its edge between two plates in the stack of crockery.

Both are flat, dry and nowhere near water. If either does not suit your apartment, edit `src/config.json`, run `python3 src/build_all.py` then `python3 pack.py`, and reprint this sheet and the guide – they both read from that file.

Otherwise put the paintings exactly where the card says, or she will hunt for something that is not there.

TWO CORRECTIONS IN THE SAME GUIDE

The tear-off count was wrong. The old guide told you to tear the last *six* leaves out of the packet. The game-master section is *seven* – the wall tracing sheet, five guide pages and the cipher solution. Following the old count leaves the wall sheet in her packet, and that sheet spells out BREATHE /BREATHE /GREEN /SIT. Count seven from the back.

Two flowchart boxes were printing on top of each other. The line beginning “ALIEN BLUES in marker...” was half again wider than its box and ran across the box beside it and off the page. Both are rewritten to fit, and the builder now refuses to draw a line too wide for its box.

Nothing of hers changed except the new card. Her pages 1-33 are exactly what you already printed. The wall tracing sheet and the cipher solution are unchanged too – keep the copies you have. With the new card slotted in, the packet is 41 pages: hers 1-34, yours 35-41.
